MARCH 29 – APRIL 2 2015

FORCING & ITS APPLICATIONS: *RETROSPECTIVE WORKSHOP*

THE FIELDS INSTITUTE, 222 COLLEGE ST.

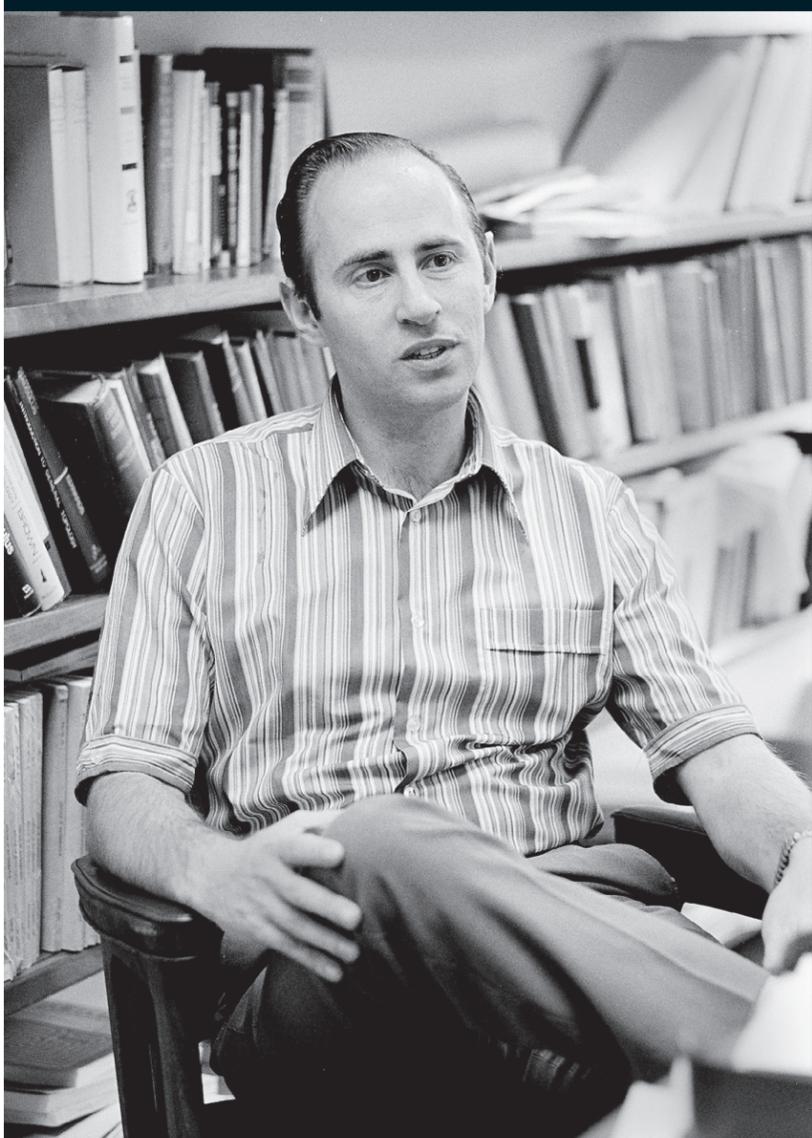

IMAGE: CHUCK PAINTER / STANFORD UNIVERSITY NEWS SERVICE

In the years 1963-1964, Paul Cohen developed the method of forcing in order to settle Cantor's Continuum Problem. Since then, the method of forcing has been adapted into a broadly applicable technique for showing that a given statement is consistent with the axioms of mathematics.

This workshop will bring together several different aspects of set theory related to forcing. These range from singular cardinals and infinite combinatorics to applications of set theory to other fields of mathematics such as analysis and topology.

Organizing Committee

Justin Moore
Cornell University

Stevo Todorcevic
University of Toronto
